

Location: Glasgow, Scotland
Job Title: Field Service Engineer
Position: Permanent (Full Time)

Elimpus is a technology company providing condition monitoring solutions and services to electrical utility companies around the world. Due to continued growth within the company we are looking for a talented engineer to carry out field service and support requirements at customer sites predominantly in the UK.

The role will involve working individually or within a small team testing a variety of electrical assets within High Voltage substations. This will require interaction with customers, reporting on findings and advising on any remedial action that should be taken to prevent a system failure. This role will provide scope for the successful applicant to work creatively and independently on innovative ideas as well as within a friendly team environment.

The successful candidate must be ambitious, an innovator, self-motivated and highly talented. An understanding of power systems and industry authorisations is desirable but is not essential as long as the candidate is willing to learn. Excellent practical skills, organisation, communication skills, and the ability to work to deadlines are a must to be successful. You must be prepared to travel, often at very short notice, for short durations primarily within the UK.

MAIN RESPONSIBILITIES

Field based work:

- On-line testing of high voltage equipment using non-invasive technologies
- Data handling, analysis and reporting
- Maintaining effective operation of on-line test and monitoring systems in the field

Office based work:

- Identifying and developing innovative, creative and flexible improvements to our testing equipment.
- Monitor on-line equipment.
- Providing remote technical assistance to customers
- Provide feedback to Quality Manager on equipment performance issues
- Work in tight collaboration with the rest of the team.

EXPERIENCE AND SKILLS REQUIRED

The ideal candidate for the above post will have:

- Completed time served apprenticeship with electrical background
- Minimum of HNC in Electrical discipline essential
- Power industry experience preferred
- Strong written and verbal communication skills in English
- Commercial Awareness
- Self-starter with a willingness to learn
- Current UK drivers license

WE OFFER

- Competitive package commensurate with experience
- On job training
- Stimulating and empowered work environment
- Challenging role with direct impact on company performance
- Opportunity for personal and professional development
